

Practical No:05	
Name of Student	YASH SANGRA
PRN No.	26070122239
Batch	2026-30
Class	CSE C-3
Academic Year & Semester	1 st year and 1 st semester
Date of Performance	19.9.2026
Title of Assignment:	To understand and implement Creating a Simple Personal Website using HTML/CSS with Generative AI Tools
Objective	To learn how to create a personal website using HTML and CSS, and to understand the role of Generative AI tools in automating web development tasks.
Theory:	A personal website is a digital portfolio that showcases your skills, projects, and achievements. Traditionally, developing such websites requires knowledge of HTML and CSS. However, Generative AI tools (such as ChatGPT or GitHub Copilot) simplify the process by automatically generating website structure, layout, and design code based on natural language prompts. Key Concepts: • HTML (HyperText Markup Language): Defines website structure and content. • CSS (Cascading Style Sheets): Provides styling, layout, and visual appearance. • Generative AI: Assists in generating HTML/CSS code, color palettes, and layouts based on user input prompts.

**Source
Code/Algorithm/Flow
Chart:**

Example – HTML Structure:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <title>My Portfolio</title>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1">
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <h1>Welcome to My Portfolio</h1>
  <p>This is my personal website created using Generative AI
assistance.</p>
</body>
</html>
```

Example – CSS Styling:

```
body {
  font-family: Arial, sans-serif;
  background-color: #f4f4f9;
  color: #333;
  text-align: center;
}
h1 {
  color: #0078d7;
}
p {
  font-size: 18px;
}
```

Practice Programs:	☐ Use a Generative AI tool (e.g., ChatGPT or Copilot) to generate the base code for a personal portfolio website. ☐ Customize the generated website with your name, profile photo, and brief introduction. ☐ Add a “Projects” section showcasing at least two projects. ☐ Modify CSS styles (colors, fonts, layout) to personalize your site. ☐ Host your website using GitHub Pages or Netlify and share the published link.
Output Screenshots	<pre>CODE: <!DOCTYPE html> <html lang="en"> <head> <meta charset="UTF-8"> <meta name="viewport" content="width=device-width, initial-scale=1.0"> <title>Nature Theme Canteen Menu</title> <style> :root { --bg-outer: #e6f2eb; --bg-inner: #f4fbf7; --header-bg: #dceddf; --text-main: #2b4733; --text-muted: #6b8774; --accent-green: #689f76; --accent-light: #a9c7b2; --card-bg: #ffffff;</pre>
